

RSI 1h Edge Discovery - Phase 2D Findings

Batch: ema200_rsi_1h_edge_phase2d_broad_1h_width_discovery_fee04; candidates 187, ok 187, failed 0.

1. Executive conclusion

Phase 2D found a valid main-rail 1h ATR width candidate: 1h 2.15 w2/r2.75/lb20. It improves PF/PnL versus the base core while keeping both sides profitable, but it is still more short-tilted than the base sharp core.

Decision: do not replace base width blindly. Carry two lanes: base w11/r12 as balanced local pullback core, and 1h w2/r2.75 as a new 1h-width ridge candidate that needs focused confirmation.

2. Group summary

Group	n	Median PF	Max PF	Median PnL	Max PnL	WR	Trades	Accept
